

MOHAMED ABDUL HAMEED

Full-Stack Developer & Automation Engineer

Jeddah, Saudi Arabia · Open to remote worldwide
emah84@gmail.com
github.com/Mohamed-AH · linkedin.com/in/mojed7

Self-taught full-stack developer and automation engineer. After a decade+ in construction operations, I learnt to code with the 100Devs community and turned my department's biggest bottleneck into a production automation pipeline that **processed 3,300+ Oracle JD Edwards work orders with a 90% reduction in manual handling time**. Since then I've shipped live full-stack platforms, PWAs, and real-time data visualizers on Node, Python, MongoDB, and WebGL. **CKA and Oracle Cloud certified**.

01 TECHNICAL SKILLS

LANGUAGES	JavaScript (ES6+), Python, VBScript, Bash / Shell, HTML5, CSS3, Autolt
BACKEND	Node.js, Express, REST APIs, MongoDB, OAuth & JWT, data pipelines
FRONTEND	Modular ES6 architecture, Three.js / WebGL, real-time visualization, PWAs, service workers, offline-first
CLOUD & DEVOPS	Kubernetes (CKA), Docker, Oracle Cloud Infrastructure, Cloudflare Workers / R2, Git & CI/CD, monitoring (Sentry, Grafana)
AUTOMATION	Browser & process automation, LLM API integration (Claude, Gemini), PDF extraction, retry logic & validation
ENTERPRISE	Oracle JD Edwards EnterpriseOne

02 EXPERIENCE

2011 – Present

BT Applied Technology
Jeddah, SA

Operations

- ◇ Ran end-to-end Oracle JD Edwards work-order operations in a construction environment for over a decade — the domain knowledge the automation below is built on.
- ◇ Designed and built an **end-to-end automation pipeline** (Python, JavaScript, VBScript, Autolt) with Claude-API PDF extraction and field mapping — **3,300+ work orders processed at a 90% reduction in manual handling time**.
- ◇ Architected the system as five integrated components — PDF processing, work-order creation, material management, inventory, and document handling — with retry logic, validation, and logging across every stage.

2022 – Present

100Devs
Cohort 2

Full-Stack Development — 100Devs

- ◇ Went from zero to shipping full-stack applications with the 100Devs community — JavaScript, Node, MongoDB, and modern web fundamentals — building and deploying the platforms and visualizers below, most of them live.

03 SELECTED PROJECTS

JDE Work Order Automation System FLAGSHIP · PRODUCTION

Deployed at BT Applied Technology

End-to-end automation for Oracle JD Edwards work orders — from Claude-API PDF extraction and field mapping through to automated inventory and document handling. Five integrated components with retry logic, validation, and logging; **running in production and processing work orders weekly**.

Python · JavaScript · VBScript · AutoIt · Claude API · Browser automation

Fablewurud PRODUCTION PLATFORM

rasmi Hassan.com · source

Live full-stack platform hosting and searching two scholars' archives — **3,200+ audio files, 116 PDFs, and 300+ articles** with full-text search across the whole library. Node/MongoDB backend, Google auth, media on Cloudflare R2 and Oracle Cloud, with Sentry and Grafana for error tracking and monitoring.

Node.js · MongoDB · Google Auth · Cloudflare R2 · OCI Storage · Sentry + Grafana

Hafiz FULL-STACK · PWA

live demo · source

Cloud-synced, installable PWA for tracking Quran memorization — daily logging, streaks, and statistics. Node/Express and MongoDB Atlas with OAuth (Google + GitHub) and JWT, plus an on-device speech-recognition coach that scores recitation entirely in the browser.

Node / Express · MongoDB Atlas · OAuth + JWT · Web Speech API · PWA

SpaceWiki REAL-TIME · 3D

live demo · source

Client-side 3D console tracking **~12,000 live satellites** — pulling element sets from CelesTrak and propagating orbits with SGP4 in the browser. Textured Blue Marble globe with a real day/night terminator, click-to-inspect telemetry, and replays of historic launches and deep-space probe missions.

Three.js · satellite.js / SGP4 · WebGL · CelesTrak API

04 CERTIFICATIONS

Certified Kubernetes Administrator (CKA)	Linux Foundation · 2025
OCI Migration Architect Professional	Oracle Cloud · 2025
OCI Networking Professional	Oracle Cloud · 2025
OCI Generative AI Professional	Oracle Cloud · 2024

05 EDUCATION

100Devs Software Engineering

Full-stack bootcamp · 2022

Intensive full-stack program — JavaScript, Node, Express, MongoDB, REST APIs, and modern web development practices.
