

MOHAMED ABDUL HAMEED

Full Stack Developer | Automation Engineer | System Administrator

Jeddah, Saudi Arabia (Open to Remote - Worldwide) • emah84@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Self-taught Full Stack Developer with 14 years of system administration experience, specializing in process automation and enterprise system integration. Built end-to-end automation system using Python, JavaScript, VBScript, and Autolt that processes JD Edwards work orders—from PDF extraction via Claude API to automated inventory management—achieving 10x efficiency improvement and processing 300+ work orders monthly. Strong foundation in Node.js, Express, MongoDB, and DevOps practices. Certified Kubernetes Administrator (CKA). Seeking remote developer role to apply automation expertise and full-stack development skills.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, VBScript, Bash/Shell, HTML5, CSS3, Autolt

Backend & Frameworks: Node.js, Express.js, REST APIs, Elixir (Phoenix LiveView)

Databases: MongoDB, PostgreSQL

Automation & Integration: Browser automation, Process automation, API integration (Claude, Gemini), Error handling & retry logic, File processing

DevOps & Infrastructure: Linux System Administration, Docker, Kubernetes (CKA Certified), Oracle Cloud Infrastructure, Git

Enterprise Systems: Oracle JD Edwards EnterpriseOne, MS Excel

PROFESSIONAL EXPERIENCE

System Administrator & Automation Engineer | BT Applied Technology (BT Group) | *Jul 2011 – Present (14+ years)*

- Architected end-to-end automation system for Oracle JD Edwards work order processing using Python, JavaScript, VBScript, and Autolt—processing 3,300+ work orders over 11 months with 90% reduction in manual processing time (300+ monthly average)
- Integrated Claude API for intelligent PDF data extraction and field mapping, eliminating manual data entry and improving accuracy
- Built modular system architecture with 5 integrated components: PDF processing, work order creation, material management, inventory processing, and document handling
- Implemented browser automation with comprehensive error handling, retry logic, validation, and logging across all pipeline stages
- Administered Oracle JD Edwards EnterpriseOne system including configuration, user support, and integration with automation workflows
- Maintained Linux systems and created automation scripts to streamline IT operations and improve team efficiency

KEY PROJECTS

JDE Work Order Automation System | [GitHub](#)

- Production automation system deployed at BT Applied Technology, processing 75+ work orders weekly end-to-end with PDF extraction, field mapping, and inventory management
- **Technologies:** Python, JavaScript, VBScript, Autolt, Claude API, browser automation

Fly.io AI Incident Assistant | [GitHub](#)

- Real-time incident monitoring dashboard with AI-powered chat assistance built for Fly.io challenge

- **Technologies:** Elixir, Phoenix LiveView, WebSockets

PostgreSQL RAG Chatbot | [GitHub](#)

- Question-answering chatbot using Retrieval Augmented Generation with vector embeddings and semantic search
- **Technologies:** LangChain, Pinecone, Gemini API, PostgreSQL

Allyment - Social Memory App | [Live Demo](#)

- Full-stack social memory application with user authentication, data storage, and CRUD operations
- **Technologies:** Vanilla JavaScript, HTML/CSS, Node.js, MongoDB

EDUCATION & TRAINING

100Devs Software Engineering Bootcamp | *2021 – 2022*

Comprehensive full-stack software engineering program covering JavaScript, Node.js, Express, MongoDB, RESTful APIs, and modern web development practices

CERTIFICATIONS

- [Certified Kubernetes Administrator \(CKA\)](#) – Cloud Native Computing Foundation
- [Oracle Cloud Infrastructure 2025 Migration Architect Professional](#)
- [Oracle Cloud Infrastructure 2025 Networking Professional](#)
- [Oracle Cloud Infrastructure 2024 Generative AI Professional](#)
